

Late Filing

Dear FCC Commissioners & Staff:

I have found the best ISP ever. It is not a BELL Company. It's a small dial-up in my own home town. NOT ONLY do they give me good service, but they are THERE when I need them, answering my questions, helping me with problems, even repairing my mistakes. That is NOT something done by the 'BIG' guys. All I ever got from the 'BIG' guys were disconnects and someone telling me it was 'my computer' -- usually after a 45 minute long distance call.

This NPRM called Appropriate Framework for Broadband Access to the Internet Over Wireline Facilities is WRONG WRONG WRONG.

It does not help me. It will take jobs away from my own home town, and service that we have come to expect and receive from our ISP. PLEASE DON'T DO THIS  
!!!!!!

All the phone companies want is just more and more money. LEAVE MY ISP alone.  
It's the best competition to those BIG GUYS there ever was.....DON'T DO IT !!

Sincerely,

Sam Reynolds
